

MINUTES for LMT Airport Review Panel

October 12, 2023

Present:

Review Panel Members: Richard Preston and Joanne Guiniven

Others: Judy Hoechner (Trenton Threatened Skies representative, Connie Jacobs (Yardley resident) and Rett Campbell (Ewing resident)

Business:

With 2 of the 5 Review Panel members present, a quorum not present and motions could not be put forward including approval of prior minutes.

Review Panel Discussions and working activities:

- Harvest Day was cancelled due to rain and high winds.
- The BoS followed up on our written request for a letter to PA DEP to request their involvement in the PFAS site remediation project
- The outreach to the Ewing Green Team led to no response. We may need to try and talk to residents directly about their concerns regarding air traffic growth since the Ewing Mayor controls the Ewing Green Team.
- TTS personnel reported to have met with Senator Booker's staff from NJ and felt they received a favorable response from his office.
- No response was received from Tufts University regarding potential air pollution monitoring of ultrafine particulates.
- Discussions were held about regarding how to inform the Environmental Justice communities about the increase in air pollution drifting towards their community as the air traffic grows. The possibility of reaching out to local churches in the area was discussed.
- The airport had comments in the press that the enplanement projections reflected their belief that there would be a significant drop in activity at the air school. We discussed putting a question to the school to see if they had the same view or were the airport comments a way to make the numbers look better.
