

Lower Makefield Township Annual Environmental Stewardship Award

In 2008, LMT, through the Environmental Advisory Council, introduced its Environmental Stewardship Award. The Award is presented to an individual, business or group and focuses on accomplishments that have contributed positively to both the environment and the Lower Makefield community. This year, the award will be presented to the group of Pennsbury High School Honor Society students who played a major role in the 2017 electronics waste recycling campaign. This campaign was a very large undertaking, with multiple municipalities and around 1,000 vehicles participating . The student's energy and enthusiasm went a long way toward making this event the success that it was.
