

Lower Makefield Twp Community Trail Connection

Lower Makefield Township, Bucks County, PA

SR 0000 Section LMT, MPMS No. 111468

Project Description

7/3/2018

The project proposes to connect gaps in the existing multi-use trail network along the southern side of Edgewood Road (T-767), in front of the baseball fields that are across the street from the Lower Makefield Township Building. The project also proposes safety improvements within the existing curbs for the signalized intersection of Edgewood Road & Oxford Valley Road (T-344), and extension of the trail network along the western side of Oxford Valley Road, from Edgewood Road to the parking lot by the softball fields, opposite Roelofs Road. A proposed pedestrian crossing of Oxford Valley Road at Roelofs Road will connect the neighborhood on the eastern side of the road to the ball fields on the western side. Approximately 3,300 linear feet (0.63 miles) of trail will be constructed through this project. The project includes approximately twenty curb ramps which will be upgraded to comply with current ADA standards. The project improvements will include trails, signal equipment, pedestrian crossings, ADA curb ramps, and any signing, pavement marking, storm water management, and drainage modifications that are necessary to implement the proposed improvements.
