## Notes

CLG requirements in PA.

- Demonstrate a commitment to historic preservation as a vital and integral component of community and economic development;
- Implement and enforce state and local laws, policies, and procedures that advance preservation goals and uphold the public interest;
- Engage the public in historic preservation issues.
- Maintain, utilize, and share current information about historic resources in their community;
- Appropriately manage and maintain historic resources in their ownership;
- Provide adequate human and financial resources to implement historic preservation programs effectively; and
- Actively participate in regional, state, and national preservation programs.

Master Plan Goal #4 calls for the Historical Society to curate resources. They have donated all those resources to LMT, and the Historical Commission began curation in 2025. They have been inventoried and labeled, and the next step is to scan and enter them into Past Perfect.
